

## Audio Precision Leasing Program

Full benefits of ownership without the capital cost.

<i>Instrument</i>	<i>24 mths</i>	<i>36 mths</i>	<i>48 mths</i>	<i>60 mths</i>
APx585 w/HDMI+DSIO	\$1,625	\$1,100	\$850	\$700
SYS-2722 or APx585	\$1,200	\$825	\$625	\$525
APx525 or ATS-2	\$600	\$400	\$300	\$250
APx520 or P1DD	\$475	\$325	\$250	\$200

Typical monthly rates for an established private company with good credit at various terms

Audio Precision offers long term leases for companies that prefer small monthly payments over a large capital outlay. Leasing is ideal for startups that need test gear to get to market and established companies that want to keep engineers equipped with the latest technology but may wish to conserve capital.

Leasing through Audio Precision preserves existing lines of credit and offers better fixed rates than traditional bank loans. There are no restrictive covenants and no cross collateralization with other company assets.

The application is one page and a decision is usually made within 2-4 hours. No down payment is required and the first payment is due 30 days after receipt of the instrument. There are no penalties for early buyout and flexible payment options are available. At the end of the term, depending on the type of lease, the instrument can be bought for one dollar.

### There is no need to compromise

Audio Precision is the recognized standard in audio test because our instruments are the best in the industry. Leasing allows companies on any budget to get to work quickly and easily without having to choose between performance and cash flow.

### Tax & accounting benefits

AP leases are structured to allow maximum tax benefit. Depending on the type of lease, the entire payment can be deducted as a direct operating expense rather than a capital investment. Leasing also allows the instrument's value to be depreciated faster, reducing taxes over the term of the lease.

### AP Rental Program

For short term projects, AP still offers month-to-month rentals at very competitive prices. Like all AP analyzers, every rental is ISO:17025 calibrated and comes with free tech support for the entire rental period. If the short term project turns into a long term need, AP will apply 25% of the rental fee as credit towards a new instrument purchase or lease.
